

## MARKETING BULLETIN

**To:** All Mansfield® Plumbing Distributors and Sales Team

**Date:** March 23, 2005

**Re:** New 2075 Urinal Flush Valve Launch

**Mansfield® Plumbing Products LLC** is proud to introduce the model 2075 Urinal Flush Valve, suitable for all light commercial applications. Fits all urinals with 3/4" top spud and features a cartridge style flush valve so there is no diaphragm to clog.

**Urinal Flush Valve (Model 2075):** A cartridge style flush valve with wall escutcheon, low control check valve with 1/2" FIP inlet, adjustable horizontal extension, flush valve body, integral vacuum breaker, chrome tailpiece, 3/4" spud nut, spud escutcheon, brass friction ring and spud seal.

This **Mansfield** product **meets and exceeds all AASE & UPC (pending) standards for performance**, including Mansfield's own rigorous internal testing standards. This product is covered by Mansfield's *Limited One Year Warranty*.

**List Pricing:** This product will follow the Mansfield Plumbing discount program.
