### Offering Only Unplated 300 and 500 Series Wall Hydrants

Mansfield® Plumbing will begin only offering unplated 300 and 500 series frost proof wall hydrants beginning July 1, 2005 due to increased costs and environmental issues. Samples of the unplated hydrant will be sent to all sales representatives. Please make sure the representatives inform distribution on this change.

Plated wall hydrants will be shipped until the current inventory is depleted. At that time all future shipments will be shipped automatically changed to the unplated models. There will be no change in the pricing.

Please direct all questions to Steve Baker (419) 938-1334.

Thanks you,
